NEMSIS Version 3.2.0 Demographic (Agency) Dataset Submission Requirements

The submission of the national elements of the NEMSIS Version 3.2.0 Demographic (Agency) Dataset is based on three primary categories of submission: 1) With every EMS XML file; 2) Initially, annually, and as updated; and 3) Submission of state specific elements to the NEMSIS National Database.

Every EMS XML File

Three elements will be submitted in every (ePCR - Patient Care Record) EMS XML File. This includes all EMS responses, regardless of patient contact. These elements are listed below in green shading. In addition, these elements will also be submitted prior to the first submission from an agency to a state, annually, and as updates occur within the agency. The ability of a software application to submit these 3 elements with every to EMS XML file will be evaluated during the compliance testing process.

Initially, Annually, and As Updated

Twenty nine elements will be submitted by the EMS Agency to the State (and the State to the NEMSIS National Database) prior to any v3.2.0 EMS XML file submission. This will provide the state and NEMSIS with "initial" baseline information for the EMS agency. As the data changes for each of these elements (i.e., is updated) the elements shall be submitted to the state. These elements are listed below in blue shading.   These data will be submitted from the EMS Agency to the State and the State to the NEMSIS National database either 1) daily or 2) via a trigger which is activated when a change occurs to an element. The state and national systems will be able to identify if an update has been made by comparing the data for each agency. The state systems only need to store the information as it changes. The ability of a software application to initially export and export revisions to these elements will be evaluated during the compliance testing process.

State to NEMSIS Database

Three elements will be submitted only by the State to the NEMSIS National Database. These elements are related to the procedures, medications, and protocols that a state may mandate (or suggest) that an EMS agency utilize. These elements will also be submitted initially, prior to the first submission to the NEMSIS National Database, annually, and as updated throughout the year. These elements are listed below in light yellow shading.
